Grzegorz Grześkiewicz*

The Polish Economic Society—Bydgoszcz Branch

The Polish Economic Society—Bydgoszcz Branch has been actively bringing together economists, managers, academics, and business professionals from the Kuyavian-Pomeranian region for over 60 years. Our branch focuses on promoting economic knowledge, supporting regional development, and strengthening ties between the local academic and business communities.

Key Achievements and Statutory Activities

Conferences and academic seminars: We regularly organize conferences dedicated to current economic challenges facing both the region and the country, providing a dynamic platform for the exchange of knowledge and experience between academia and business.

Education and the Economic Knowledge Contest: We are deeply committed to youth education, coordinating activities related to the Economic Knowledge Contest, and helping to shape future generations of leaders within the economic community.

Implementation of EU projects: The Bydgoszcz Branch of the PTE is a key operator of European funds in the region. We specialize in projects focused on professional activation, youth employment support, innovative education, and social services, thereby supporting the economic development of the region. Furthermore, we successfully implement grant programs that enable unemployed people to start their own businesses and distribute funds for training and workforce development in the micro, small, and medium-sized enterprise (MSME) sector.

Consulting and expertise: Our experts provide specialized consulting services on EU funds to local governments and train beneficiaries in project reporting and accounting under the current EU financial framework.
